CAREER OBJECTIVE

Detail-oriented Master of Information Technology student at QUT with hands-on experience in manual testing, debugging, and quality assurance across mobile and web applications. Skilled in end-to-end testing, bug reporting, and risk assessment with a strong eye for identifying critical issues. Proven collaborator in Agile development environments, eager to deliver exceptional quality in a fast-paced software agency.

EDUCATION

Queensland University of Technology - Brisbane, Australia
Masters in Information Technology

Nirmala College - Muvattupuzha, India
Bachelor of Computer Applications

EXPERIENCE

Developer Intern - Progressive Software Solutions *November 2024 - April 2025*

- Developed cross-platform mobile applications using Flutter and Dart.
- Integrated REST APIs and Firebase services to enhance application functionality.
- Designed responsive and user-friendly interfaces following modern UI/UX principles.
- Performed manual testing and debugging of cross-platform mobile applications to identify bugs, ensure UI/UX consistency, and improve overall application quality.
- Reported and tracked bugs through project management tools, prioritising critical issues and collaborating with developers on resolutions.

PROJECTS

Cybersecurity Governance & Risk Assessment Project

- Conducted organisational cybersecurity risk assessments.
- Evaluated security controls and governance frameworks.
- Presented risk assessment findings and recommendations to executives, CEO, and department heads through board-level presentations.
- Applied Governance, Risk and Compliance (GRC) principles.
- Used Wireshark to analyze incoming network traffic, identify security vulnerabilities, and inform risk mitigation strategies.
- Collaborated with stakeholders to perform security auditing of internal controls, ensuring alignment with ISO 27001 standards and proactive risk mitigation.

Software Lifecycle Management Project

- Used JIRA to manage SDLC project tasks, sprints, and progress tracking within an Agile development workflow.
- Evaluated software delivery strategies using agile development practices.
- Analysed stakeholder requirements and translated business needs into structured software solutions.
- Developed skills in software project management, risk assessment, and quality-focused software delivery.
- Implemented CI/CD pipelines using GitHub Actions for automated build and deployment workflows.
- Deployed application backend on AWS EC2 for cloud-based hosting and scalable infrastructure.

NSync – CAMPUS MANAGEMENT PLATFORM

- Flutter-based app to manage campus events and clubs.
- Features include College News section, Event Management for faculty, and student club enrollment.
- Skills Developed: Web development, database management, Dart scripting, teamwork and project management.
- Integrated authentication for secure user login and account management.

TECH SHACK - ONLINE E-COMMERCE STORE

Team Leader

- Designed and built a full-stack web development solution for an online e-commerce store, handling UI, secure payment mockups, and backend inventory management.
- Designed a responsive user interface, implemented secure payment mockups, and built backend functionality for inventory management and order processing.
- Technologies Used: PHP, MySQL, HTML, CSS, JavaScript, jQuery, Ajax.
- Skills Developed: Web development, database management, PHP scripting, teamwork and project management.
- Integrated OAuth2 authentication for secure user login and account management.

EXPERTISE

- Programming Languages: Python, Java, SQL, Dart, JavaScript
- Frameworks & Technologies: Flutter, Android Development, REST APIs, HTML, CSS, Bootstrap, MySQL, MongoDB
- Tools & Platforms: Git, GitHub, Visual Studio Code, Android Studio, AWS, CI/CD
- Cybersecurity & Governance: Cybersecurity Governance, Governance Risk & Compliance (GRC), Risk Assessment, Risk Management, OAuth 2.0
- Professional Skills: Problem Solving, Teamwork, Communication
